EXPERIENCE

Member of Design Staff at Cognition

2026 - CURRENT • NEW YORK, REMOTE

Building Devin, the first autonomous engineer.

Senior Product Designer at Notion

2024 - 2026 • NEW YORK, REMOTE

Leading design for Notion Mail and Notion Calendar. Sole designer on Mail, building 0-1. Launched to GA in April 2025. Launched in Mail & Calendar connections in Notion Agents, and exploring AI experiences within each product.

Android Product Designer at The Browser Company

2024 • REMOTE

I worked on a two-month contract to bring Arc Search to Android. I led the redesign with an Android-first approach, developing a native design system tailored to the platform. Arc Search for Android successfully launched to beta in October 2024.

Product Designer at Skiff

2023 - 2024 • REMOTE

I designed across Skiff's suite of apps: Mail, Drive, Pages, and Calendar—for web, iOS, and Android. I led the design and partnered closely with engineers on highly technical initiatives features including Quick Aliases, PGP support, and Noise-Cancelling. I redesigned and launched the new iOS native Drive and Pages apps.

Visual and Product Designer at WOMBO

2021 - 2023 • TORONTO

A founding member of the WOMBO team, driving rapid iteration on new product features, marketing assets, and animations. I worked closely with the iOS and Android teams to continuously enhance both the WOMBO and Dream by WOMBO apps. I led the design of key premium features for the Dream mobile app, including multi-output generation, which became the highest-converting feature for Premium users.

EDUCATION

Bachelor's of Design at York University / Sheridan College

2017 - 2021 • TORONTO
