EXPERIENCE

Product Designer at Notion

2024 – CURRENT • NEW YORK

Leading end-to-end design for Notion's newest product, Notion Mail. Overseed all aspects of the experience including AI integration, the editor, monetization, and growth (across both desktop and mobile). Brought the product to beta access in October 2024 and full public release in April 2025.

Android Product Designer at The Browser Company

2024 • REMOTE

Worked on a two-month contract to bring Arc Search to Android. Led the redesign with an Android-first approach, developing a native design system tailored to the platform. Arc Search for Android successfully launched to beta in October 2024.

Product Designer at Skiff

2023 – 2024 • REMOTE

Designed across Skiff's suite of apps—Mail, Drive, Pages, and Calendar—spanning web, iOS, and Android. Led the design of key privacy/focused features including Quick Aliases and Noise-Cancelling. Redesigned and launched the new native Drive and Pages apps. Partnered closely with engineers on highly technical initiatives, such as PGP support.

Skiff was acquired by Notion in February 2024.

Visual and Product Designer at WOMBO

2021 – 2023 • TORONTO

A founding member of the WOMBO team, driving rapid iteration on new product features, marketing assets, and animations. I worked closely with the iOS and Android teams to continuously enhance both the WOMBO and Dream by WOMBO apps. I led the design of key premium features for the Dream mobile app, including multi-output generation, which became the highest-converting feature for Premium users.

EDUCATION

Bachelor's of Design at York University / Sheridan College

2017 – 2021 • TORONTO
